No VoIP Audio in Meeting when Using Microsoft Vista

Common symptoms you may be experiencing:

No VoIP audio in meeting when using Microsoft Vista.

No audio in session.

I am not getting audio in my internet phone session.

Solution:

Follow the steps below to adjust audio settings:

1. Right-click the speaker icon in the computers system tray.
2. Left-click on **Open Volume Mixer**.
3. Increase volume settings for applications using the left mouse button.
